DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct

species: an electrode comprising a compound:

Species 1, compound cited in claim 2,

Species 2, compound cited in claim 3,

Species 3, compound cited in claim 4,

Species 4, compound cited in claim 5,

Species 5, compound cited in claim 6.

If pick Species 1, please further define R3, R4, R5 and R6

Species 2, please further define X and R7 and R8

Species 3, please further define X and Y

Species 4, please further define R9 and R10.

Please further elect if the compound comprises a polymer compound having a plurality of structures or does not.

If yes then,

Please further elect if the polymer compound has a polyacetylene chain as a main chain or does not.

Please further elect if the polymer compound forms a film or does not.

Please further elect the chemical bond which bonds the substrate and compound.

Art Unit: 1745

Please pick a covalent bond; (A) Si-O bond; B) Ti-O bond or C) amido bond or a coordinate bond D) metal-sulfur bond.

2. The species are independent or distinct because the compounds listed all have very different structures.
3. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 10-15, and 28 are generic.
4. A telephone call was not made due to the complexity of the election of species to request an oral election to the above restriction requirement, therefore an election has not been made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
